Papaki.gr

Notifications

1. Introduction

Http posts are send to Resellers to inform them when a domain or a process status changes.   A url should be provided to Papaki.gr for example https://www.mydomain.gr/mypage.php

The registrar's web server must return an HTTP code 200 to the registration system.

The body of the reply must contain exactly the string "COMPLETED" (in uppercase and without end-of-line).

2. POST Fields

Field	Description
ACTIONTYPE	Type of action
ACTIONCODE	Response Code
ACTIONMESSAGE	Response Message
REQUESTID	Request id (for change ownership)
UNIQUEID	Uniqueid (for eett approvals)
COMMENTS	Comments if required
